Don't wait until your mixer tap
flexi hose looks like this

Part No 103-HMTK

Causing costly issues....

An industry changing product

Gas Components Australia have invested heavily to design and manufacture a new hard-line copper tube system in a simple kit for Hot and Cold Mixer Taps, it replaces troublesome leak prone flexible hoses found in most domestic & commercial premises.

These are a direct replacement for all flick mixer taps, carry Watermark certification eliminating the need for flexible hoses.

Insurance data shows that 47% of insurance claims were as a result of water damage and 1 in 4 of those were directly related to burst flexible hoses; with the average claim being almost \$15,000.

By having a qualified plumber install our Hard Line Mixer Tap Kit you will alleviate any future flooding issues caused by flexible hose failure.

Support Australian Made innovation and remove faulty hoses from your kitchen and bathrooms.
